

## The Rob and Max Story Collection for Early Readers

*The Rob and Max Story Collection for Early Readers* should be every child's first reading experience. This collection was developed by Dr. Meredith McCurdy. Disappointed by popular early reading materials, Dr. McCurdy sought to provide the preschool students at Brilliant Minds Montessori with a simple and systematic phonics-based approach to reading.

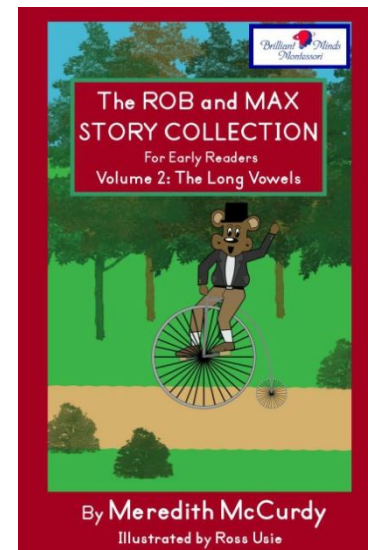

This story collection eliminates the guesswork and confusion for both teacher and student. Learning to read has never been more simple, fun, and effective.

The Rob and Max Story Collection is the companion reader to Dr. McCurdy's comprehensive reading and writing curriculum. Dr. McCurdy's Montessori Math and Reading/Writing programs are currently applied in schools and trusted by homeschoolers around the world.

## The Rob and Max Story Collection for Early Readers Volume 2: The Long Vowels

This story collection systematically approaches the introduction of long vowel sounds to the early reader. As with the prior Rob and Max volume, this collection promises not to overwhelm the student and teacher. Reading motivation is maintained by fun and interesting stories with terrific illustrations. I believe learning to read should be an exciting and rewarding experience, and this collection delivers.
